DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

4TH QUARTER 2018

VOL 7 ISSUE 4

WISHING YOU AND YOUR FAMILY A MERRY CHRISTMAS & HAPPY NEW YEAR!

Pictured above are the guys who keep us running – our Maintenance Department. Day in and day out, they make sure everything runs smoothly.

A job is not complete until it arrives at the job site. Our Shipping Department makes loading trucks with custom materials look easy!

Our steel shop has produced some amazing connections over the years. Pictured above is a large compression ring being welded.

Company Spotlight Steel Shop

Our final company spotlight focuses on our steel shop. SWS is proud to have an on-site steel shop to make custom connections for our laminated timbers.

These connections are made per the same shop drawings our fabrication department use for the laminated timber beams. We bring in sheets of steel, cut them to shape and punch holes for the bolts. These steel plates are welded together into the custom assemblies as shown on the shop drawings. With a coat of primer applied, connections and fasteners are ready to be shipped with the laminated members to the job-site. Galvanized connections are also available for wet use conditions.
