

STRUCTURAL WOOD SYSTEMS

DIVISION OF HARRISON INDUSTRIES, INC.

THE PINE PRESS

4TH QUARTER 2014

VOL 3 ISSUE 4

As 2014 ends, Structural Wood Systems would like to take the opportunity to thank you all for helping make this an exceptional sales year. The featured project for this quarter is a wonderful example of the experience and excellence SWS puts forth into each of our custom projects.

The open glass ceiling down the center of the library allows natural light to highlight the beauty of laminated timbers.

The circulation desk is a focal point thanks to the beautiful glulam canopy that hangs overhead.

The warm, natural wood tones provide a calming and relaxing atmosphere for the library's cozy reading areas.

FEATURED PROJECT Fairwood Branch Library

Structural Wood Systems takes pride in our ability to design and manufacture for a wide variety of building applications. SWS had the opportunity to provide custom laminated wood products for the award winning, Fairwood Branch Library in Baton Rouge, Louisiana.

The 15,800 square foot library offers dedicated sections for children, teens and adults. A virtual tour of the library, showing the beautifully finished details of this project, provided by Google maps, is accessible from the library's website.

SWS Agent, Lane Holland, working with Stuart & Co. G.C. LLC, the project contractor, and John Blount LLC, the erector, provided the customer with unmatched service from the design process to erection of the project.

Structural Wood Systems hopes you each had a very Merry Christmas and that 2015 is a Happy and Prosperous New Year!
